## VSAS Main screen:

### **Options:**

#### **1. File Menu**

- Email Settings - Takes you to the Email Settings screen
- View Previous Recordings - Takes you to the Previous Recordings screen
- Exit - Exits the application

#### **2. Help Menu**

- About - Credit to development team
- Help - Explains the options available to you on current screen

#### **3. Email Settings**

Takes you to the email settings screen where you may add, edit and delete email addresses for the motion detection alerts

#### **4. View Previous Events**

Takes you to previous recordings date selection screen. Here you may view a list of previous recordings executed by VSAS system

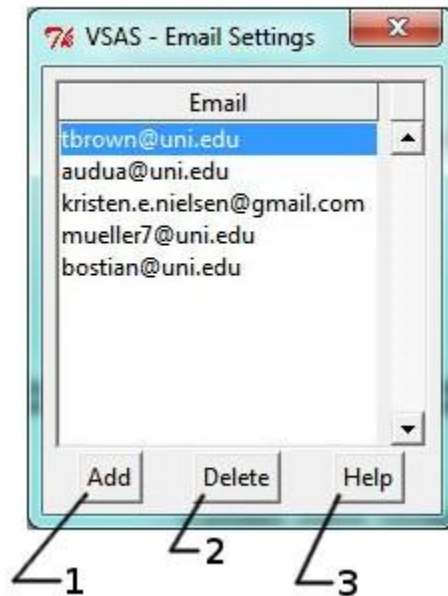

#### **5. Help**

Explains the options available to you on current screen

**Description:**

The VSAS main screen will be the screen presented to you upon first opening the program. From here, all available options are within reach including: (1) add and delete email addresses via Email Settings and (2) viewing a list of previous motion detection events via View Previous Recordings.

## Email settings:

### **Options:**

#### **1. Add a new email address**

Brings up window to type in new email address to receive motion detection alerts

#### **2. Delete selected email address**

In "Email addresses list", click on the email address that you intend to delete.

Then click this delete button to remove email address.

#### **3. Help**

Explains the options available to you on current screen

### **Description:**

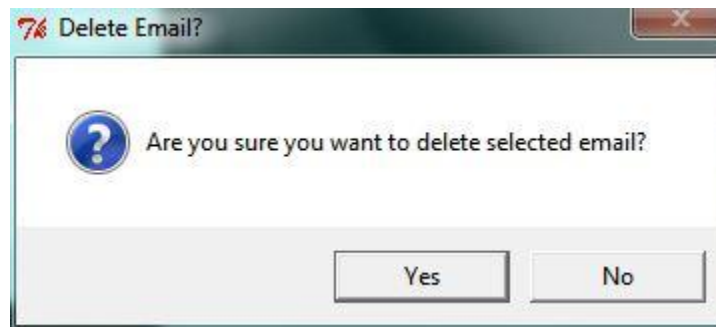

After the VSAS software system has detected motion, recorded a video of detected motion and uploaded the video online for viewing pleasure, VSAS has the ability to email users alerting them of the motion event.

The Email settings screen allows you to add, edit and delete email addresses from the VSAS email alerts list. All email addresses listed in the "Email addresses list" will receive an email

### **How to Delete Email Address:**

If you have an email address in the email addresses list that you would like to change, following these instructions:

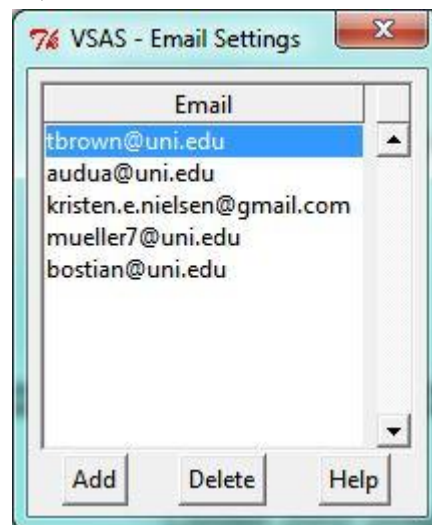

1. In Email settings screen, click on the email address in the email addresses list that you would like to delete
2. Click the “Delete” button
3. Dialog box appears confirming you would like to delete email address. Click “Yes”

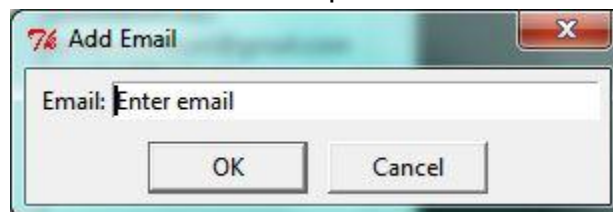

### **How to Add Email Address:**

To add an email address to the VSAS email alert system, follow these instructions:

1. In Email settings screen, click “Add”

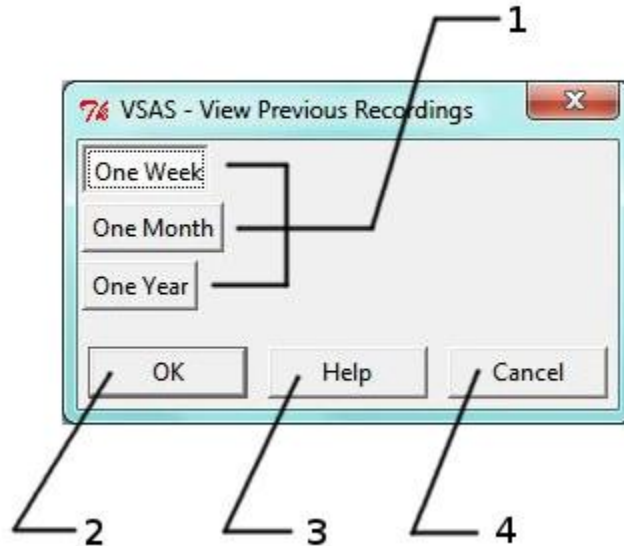

2. A dialog box will appear where you may type the email address that you would like to add. Then click “OK” when complete:

## **Previous Recordings**

## Date Selection Screen

### **Options:**

#### **1. Time options**

Length of time in history from today you would like to view

#### **2. OK**

Displays list of the previous recordings from today back to the button you selected in "Time options"

#### **3. Help**

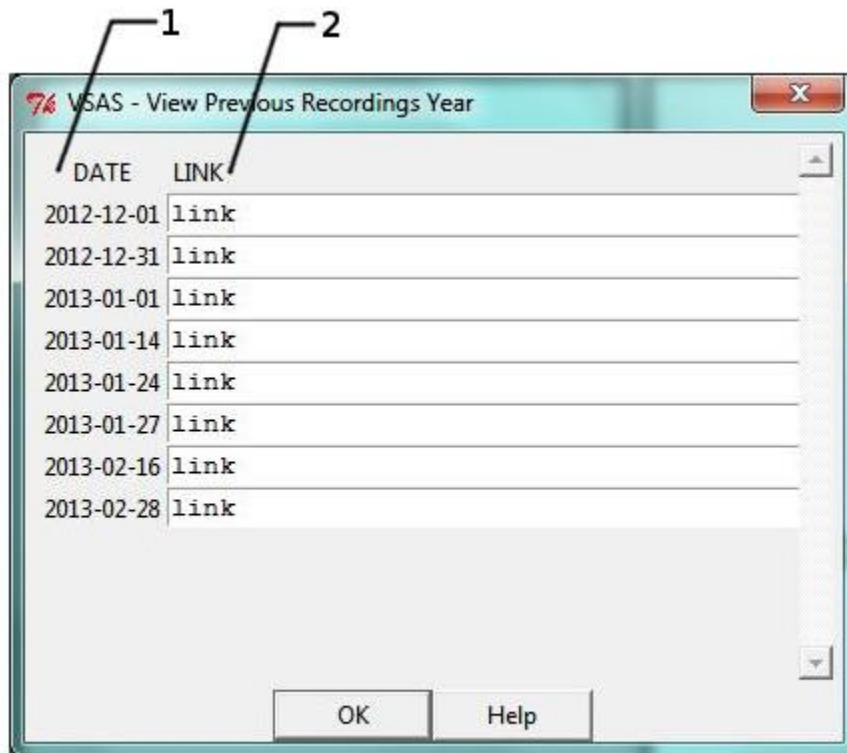

Explains the options available to you on current screen

#### **4. Cancel**

Returns you to the main screen

## Previous recordings list screen

### **Options:**

#### **1. Date column**

Displays the date of the detected motion event

#### **2. Online video link**

Displays a link to the VSAS Software website's video preview web page. Copy the link inside of the text box, and paste it into your internet browser on your computer to view and/or download the video footage.

## Troubleshooting:

### Email settings screen:

- **Please reenter email address**
  - Appears when you enter an email address that is less than 6 characters long, contains no “@” symbol, or has no “.” after the “@” symbol.
