

References:

Please help give thanks where thanks is due. As an educational project, I believe we should document all of our resources and give a thanks to them. I hope you all agree. I plan to put all of the links together from all of us and put them all into one thank you on our software website and in our "About" window in the software. Do not be intimidated by people's names being associated with links. I will combine all links together in the end without anyone's names. I just have it that way for the sake that we do not forget anything.
